Biogas Action Plan for Northern Ireland

Are you keen to green your energy supply but unsure where to start?

Are you a small engineering company who seeks opportunities to diversify your capabilities?

Are you planning to produce or incorporate biogas into energy for heat, electricity or transport?

Join us in an initiative to gather a critical mass of companies and research interests relevant to innovation in the biogas supply chain in Northern Ireland. Whether your plans are tentative or under implementation, help us put together 'the big picture' to show how biogas can benefit the local economy.

Working with Invest NI and other bodies, we aim to develop an Action Plan for Northern Ireland which will set out a range of initiatives building our infrastructure and innovation capacity in this area up to 2020 to target investment and future funding from Europe and other sources.

Biogas in Northern Ireland – A Vision for 2020

Workshop 20th June – 2:00 - 4:30pm

Agenda

- Overview presentations:
 - Waste – value to the NI economy (Robert Brennan, B9 Organic Energy International)
 - Growing rural opportunities (Thomas Cromie, agriAD)
 - Opportunities through links with other regions (Elaine Groom, QUESTOR)
- 3 minute pitches from companies seeking partners
- Interactive workshop and session – opportunities, barriers and needs.

Venue: Queen's University of Belfast - 18 College Green, room 0G.008.

Parking available if booked 24h in advance.

Contact: Angela Orozco (028 9097 5577) a.orozco@qub.ac.uk

QUESTOR Centre, Queen's University, David Keir Building, Stranmillis Road, Belfast BT9
