

QUESTOR Centre

An international partnership for environmental research and innovation

Competitiveness Through Research

QUESTOR is a global industry led collaborative research network. Established in 1989 the centre now has a world wide reputation for both innovative research and commercial exploitation of technology.

Multidisciplinary research into water and wastewater, waste and remediation, environmental monitoring and energy from biomass

How membership benefits your business:

- ◆ Exclusive and **long-established** industrial research network
- ◆ Access to world class R&D facilities at our International partners
- ◆ **Directly influence and exploit the research program**
- ◆ Unparalleled research support and market opportunities in UK, Ireland, Germany, USA and China
- ◆ Form **strategic business and R+D partnerships** with other members —30+ industrial partners
- ◆ Involvement (full partnership) in high profile international projects
- ◆ **Share the costs of R&D** — Access to a €1.75m (per annum) research programme
- ◆ Links to government and policy makers
- ◆ Proven knowledge and technology transfer and the commercial exploitation of new technologies

Multi-sectoral membership including:

Our Research Partners:

Access to researchers and facilities at each of these leading international institutions to develop new technology, products and processes

Testimonials from QUESTOR member companies and partner institutions:

Wolf Merkel, Chief Technical Officer of IWW Water Centre, Mülheim

"The collaboration with QUESTOR provided the unique opportunity to build a European research initiative under the Marie-Curie programme. The ATWARM programme has enabled us to build strong and long lasting links with other researchers and institutions."

Robert Brennan, Director, B9 Organic Energy

"Our ongoing relationship with QUESTOR provided the knowledge, credibility and confidence to set up B9 Organic Energy which is now developing the first large commercial biogas plant in Ireland; a 60,000 tonne plant producing 3MW of power."

Peter Wolfmeyer, Managing Director, ZENIT GmbH

"We have been working with QUESTOR on transnational projects for many years now. Both ZENIT and our clients in the region greatly appreciate QUESTOR's entrepreneurial approach, scientific expertise and high level of professionalism. QUESTOR is a significant and reliable network partner."

Mark Bowkett, Managing Director, T.E.Laboratories

"TelLab are currently working in 4 collaborative externally funded projects with QUESTOR research and company members. QUESTOR membership contributes enormously to our internal R&D activities by providing;

- Significant research outputs from QUESTOR projects
- Developing ongoing relationships and partnerships with Researchers
- Providing network and collaboration opportunities with other member companies"

John Toner, Managing Director, Williams Industrial Services

"As an SME in Northern Ireland, membership of QUESTOR has enabled us to access world class research and innovation. This has allowed us to develop projects and strategic partnerships that we simply couldn't do by ourselves."

Thomas Cromie, Director, agriAD

"QUESTOR have been key to the development of the knowledge base that agriAD require for the implementation of our business strategy and the achievement of our business growth targets, as a technology provider in the agri-food sector"
